Academic Program Description

This academic program description provides a brief summary of the most important characteristics of the program and the learning outcomes expected of the student to achieve, proving whether he has made the most of the available opportunities.

It is accompanied by a description of each course within the program.

1	Educational institution	Middle Euphrates Technical University
2	Scientific Department Center	Technical Institute/Samawa Oil & Gas Refining Technologies
3	Name of academic or vocational program	Oil & Gas Technologies Operation of Industrial Units and Oil Refining
4	Final Certificate Name	Technical Diploma in the Operation of Industrial and Oil Units
5	School System	Decisions for the first and second phases of the two branches
6	Accredited Accreditation Program	Modular System
7	Other external influences	Training Courses + Field Visits
8	Date of preparation of the description	2024/ /

9- Objectives of the academic program:

The Department of Chemical Industries aims to graduate qualified technical staff to carry out the operation, maintenance and control of the operating devices of oil and gas industrial units in oil factories, including conducting laboratory tests on the final raw and manufactured materials and conforming to their standard specifications.

10 - Program Outcomes Required and Methods of Teaching, Learning and Evaluation :

A- Cognitive Objectives /

- 1- Introducing the student to the methods of operating and controlling the various petroleum industrial devices and units and carrying out chemical and oil production work produced in factories .

- 2- The student compares the chemical, physical and laboratory tests of chemical and oil raw materials and contributes with specialized cadres in making modifications and improvements to industrial units
- 3- The student uses drawings, maps and industrial plans related to chemical laboratories .
- 4- Implementation of quality control work for the purpose of conformity of the product to international and Iraqi standard . specifications
- 5- Introducing the student to the use of the electronic calculator . to apply the vocabulary of the curriculum

B - Skills objectives of the program /

- 1- The student acquires the skill of conducting laboratory and oil analyzes.
- 2- Using laboratory tools and oil workshops with quality and keenness on the safety and accuracy of the results.
- 3- Implementation of graphs and diagrams for the practical lesson .

Teaching and learning methods

Book Theoretical lecture practical training in laboratories, Power point seminars and seminars Discussion page, scientific developments, summer training, educational videos, scientific trips, graduation research.

Evaluation methods

Daily evaluation, oral tests, pre-tests, weekly reports, semester exam, including the first semester and the second semester (practical + theoretical).

C- Emotional and value goals /

- 1- The student learns about the work of industrial operating units and their role in building the country .
- 2- Encourage the student to gain practical experience and link it to theoretical principles .
- 3- Learn accuracy and discipline in receiving science and knowledge 4- Learn to communicate and interact during the lecture .

Teaching and learning methods

Practical and theoretical lectures, listening to professors and ,scientists within the specialization in the scientific department through methodological and external books, through websites on

the Internet, and the presentation of scientific films, videos and field visits.

Evaluation methods

Quarterly and daily written and oral student tests and scientific reports .

d. General and qualifying skills transferred (other skills related to employability and personal development).

- 1- Communication and conversation skills such as English, computer, presentation skill and introducing the student to his rights and duties (a basic standard for human rights).
- 2- Teamwork skills and encouraging the policy of discussions so that the student has the scientific creative ability.
- 3- Self-learning skills, self-reliance and teaching the student to link the mathematical formulas of scientific laws to petroleum chemistry .
- 4- Training the student on the use of websites and modern scientific programs.

Teaching and learning methods

- 1- Daily exams with home questions to solve them self-practical . tests
- 2- . Oral tests during lectures
- 3- C - Competitive tests among groups of students for the same division.
- 4- D- Tests to encourage scientific competition between the student people and stages .

Evaluation methods

Commitment to assignments (such as making reports in the field of specialization and then discussing reports) and setting scores on written and oral tests and weekly and annual reports.

10- Program Structure (Study Plan):

Vocabulary and study units (Department of Oil and Gas Refining Technologies / for the academic year 2023/2024

First stage

t	Material	Number of hours per week			Number of Units	Material Type	Observations
		nun	on	M			
1	Petroleum Chemistry	2	3	5	10	Specialized	English
2	Light oils	3	3	6	12	Specialized	English
3	Material transmission	2	2	4	8	Specialized	English
4	Engineering drawing	-	3	3	6	Support	English
5	Computer Technologies	1	2	3	3	Support	Arabic
6	Industrial management and occupational safety	٢	-	2	4	Support	Arabic
7	mathematics	2	-	2	2	Support	Arabic
8	Measurements and transfer of ownership	1	2	3	6	Specialist	Arabic
9	Human Rights and Democracy	2	-	2	٢	Support	Arabic
10	coefficient	-	٦	٦	١٢	Support	Arabic
Total		15	21	36	65		

Second stage

Observations	Material Type	Number of Units	Number of hours per week			Material	t
			M	on	nun		
English	Specialized	10	5	3	2	Oil Refining	1
English	Specialized	10	5	3	2	Heavy oils	2
English	Specialized	12	٦	3	3	Heat transfer	3
English	Specialized	10	5	3	2	Petrochemicals	4
English	Specialized	8	4	2	2	Measurement and control techniques	5
Arabic	Specialized	8	4	2	٢	Industrial Equipment	6
Arabic	Support	3	3	2	1	Computer Technologies2	7
Arabic	year	2	-	-	1	English Language	8
Arabic	Support	4	2	٢	-	Graduation Project	9
		67	35	20	15	Total	

Course Description

This course description provides a summary of the most important characteristics of the course and the learning outcomes expected of the student to achieve, proving whether he has made the most of learning opportunities , and must be linked to the program description .

Course Description Form Table

1- Educational Institution	Ministry of Higher Education and Scientific Research Middle Euphrates Technical University / Samawa Technical Institute
2- Scientific Department / Center	Oil & Gas Refining Technologies / Operation Industrial & Oil Units
3- Course Name/Code	Mandatory operation of industrial and oil units
4- Available attendance form	Mandatory
5. Semester/Year	Quarterly
6- Total number of hours	71 hours
Date of preparation of this description	/ /2023
8. Course Objectives	<ul style="list-style-type: none"> - Graduating qualified technical staff to carry out operation, maintenance and control of Devices for operating oil industrial units in the oil plant, including And conducting laboratory tests on the final raw and manufactured materials And conforming to its standard specifications and linking theoretical information to the process. - Familiarize the student with the techniques used . - Understand and use scientific materials . - Familiarity with industrial drawings and maps . - Carrying out maintenance work for industrial unit

9 -Course Outcomes and Methods of Teaching, Learning and Evaluation:

1- For cognitive purposes /

1. Introducing the student to the methods of operating and controlling the various oil industrial devices and units and carrying out oil production work .
2. The student compares between laboratory tests for raw and resulting materials .
3. The student uses drawings, maps and industrial plans related to mechanical or oil plants .
4. Implementation of quality control work for the purpose of conformity of the product to international and Iraqi standards.
5. Linking theoretical and practical information to benefit from improving industrial reality .

2- Course Skills Objectives/

1. The student acquires the skill of conducting laboratory analyzes .
2. Using laboratory tools and chemical workshops with quality and a lesson on the safety and language of the results .
3. Implementation of diagrams and diagrams for the practical lesson.
4. The student acquires the skills of dealing with the calculator.

Teaching and learning methods

Using the theoretical and practical lecture system, electronic calculator and electronic presentation

(DATASHOW) to learn the basics of oil and gas engineering.

Evaluation methods

Testing students to see the extent of their interaction with the lecture and conducting weekly, quarterly and annual tests

C- Emotional and value goals/

- 1- The student learns about the work of industrial and practical operating units and their role in building the country .
- 2- Encourage the student to gain practical experience and link it to theoretical principles .
- 3- Learn accuracy and discipline in receiving science and knowledge
- 4- Learn to communicate and interact during lecturers.

Teaching and learning methods

High lectures, theory, visual observations and listening scientific forces in courses of professors and the Internet.

Evaluation methods

.Periodic oral tests and scientific discussions

d. General and qualifying skills transferred (other skills related to employability and personal development) /

- 1- Focus on those who have great mental aptitude and comprehension.
- 2- Encourage the policy of discussions so that the student enjoys a creative scientific family .
- 3- Developing students' mental and scientific abilities .
- 4- Raising the level of students and following up on students.

أسئلة أنية، واجبات لا صافية، امتحانات قصيرة و امتحانات شهرية	عملي	الرسم الهندسي	Sectional View	3	الرابع والعشرون

أسئلة أنبية، واجبات لا صافية، امتحانات قصيرة وامتحانات شهرية	عملي	الرسم الهندسي	Sectional View	3	الخامس والعشرون
أسئلة أنبية، واجبات لا صافية، امتحانات قصيرة وامتحانات شهرية	عملي	اوتوكاد	Introduction to the AUTOCAD program	3	السادس والعشرون
أسئلة أنبية، واجبات لا صافية، امتحانات قصيرة وامتحانات شهرية	عملي	اوتوكاد	Definition of AUTOCAD windows	3	السابع والعشرون
أسئلة أنبية، واجبات لا صافية، امتحانات قصيرة وامتحانات شهرية	عملي	اوتوكاد	Two-dimensional drawing with AUTOCAD	3	الثامن والعشرون
أسئلة أنبية، واجبات لا صافية، امتحانات قصيرة وامتحانات شهرية	عملي	اوتوكاد	Two-dimensional drawing with AUTOCAD	3	التاسع والعشرون
أسئلة أنبية، واجبات لا صافية، امتحانات قصيرة وامتحانات شهرية	عملي	اوتوكاد	Three-dimensional drawing with AUTOCAD	3	الثلاثون

Material Name	In Arabic	Petroleum Chemistry	Academic year	Weekly Hours			
	English	Petroleum chemistry		theoretical	practical	Total	Number of U
Language of instruction	Arabic/English		The first	2	2	4	10

The week	hours theoretical practical	Required Learning Outcomes	Unit or subject name	Method of education	Evaluation method
The first	2/2	Get to know a brief history About Crude Oil	Historical introduction	Theoretical/Practical	Real-time questions , duties No extracurricular, exams Short and exams Monthly, Reports Weekly
Second	2/2	Familiarize yourself with the stages of formation Crude Oil	The composition of crude oil	Theoretical/Practical	Real-time questions , duties No extracurricular, exams Short and exams

					Monthly, Reports Weekly
Third	2/2	Learn about methods of evaluating Crude Oil	Crude Oil Valuation	Theoretical/Practical	Real-time questions , duties No extracurricular, exams Short and exams Monthly, Reports Weekly
Fourth	2/2	Learn about specifications Various crude oil	Crude Oil Specification	Theoretical/Practical	Real-time questions , duties No extracurricular, exams Short and exams Monthly, Reports Weekly
V/VI	2/2	Recognize curves Distillation	Distillation curves	Theoretical/Practical	Real-time questions , duties No extracurricular, exams Short and exams Monthly, Reports Weekly
Seventh	2/2	Recognize the characteristics of refining products) Properties Petroleum gases (Products Features Refining	Theoretical/Practical	Real-time questions , duties No extracurricular, exams Short and exams Monthly, Reports Weekly
Eighth	2/2	Recognize the characteristics of Refining Products)Properties Naphtha and Caseolin	Products Features Refining	Theoretical/Practical	Real-time questions , duties No extracurricular, exams Short and exams Monthly, Reports
Ninth	2/2	Recognize the characteristics of refining products) Properties Kerosene and fuel	Products Features Refining	Theoretical/Practical	Real-time questions , duties No extracurricular, exams Short and exams

		Aircraft (Monthly, Reports
X	2/2	Recognize the characteristics of Refining products (properties Heavy diesel fuel and light)	Products Features Refining	Theoretical/Practical	Real-time questions , duties No extracurricular, exams Short and exams Monthly, Reports
atheist Tenth/ VI ten	2/2	Recognize the characteristics Solid and semi-solid	Solid and semi-properties Solid	Theoretical/Practical	Real-time questions , duties No extracurricular, exams Short and exams Monthly, Reports
Seventeenth / Twentieth	2/2	Recognize phase behavior Or three mixtures of two components	Phase behavior	Theoretical/Practical	Real-time questions , duties No extracurricular, exams Short and exams Monthly, Reports
atheist Twenty/ Fourth Twenty	2/2	Recognize the characteristics of Natural Gas / Natural Gas Composition Meet links Reed vapor pressure	Natural Gas Properties / Natural gas composition	Theoretical/Practical	Real-time questions, duties No extracurricular, exams Short and exams Monthly, Reports
V Twenty/	2/2	Heat recognition Combustion and its relationships	Combustion heat	Theoretical/Practical	Real-time questions, duties No extracurricular, exams Short and exams Monthly, Reports
Sixth Twenty	2/2	Learn about the limits Explosion and safety	Explosion limits	Theoretical/Practical	Real-time questions, duties No extracurricular, exams

					Short and exams Monthly, Reports
Seventh Twenty	2/2	Learn about scaling and pressure and its relationships	Expansion and compression	Theoretical/Practical	Real-time questions, duties No extracurricular, exams Short and exams Monthly, Reports
Eighth Twenty	2/2	Recognize the characteristics Critical for crude oil and Derivatives	Critical characteristics	Theoretical/Practical	Real-time questions, duties No extracurricular, exams Short and exams Monthly, Reports
Ninth Twenty/ Thirty	2/2	Learn the basics and Real Gas Accounts And the perfect gas	Real gas and gas Perfect	Theoretical/Practical	Real-time questions, duties No extracurricular, exams Short and exams Monthly, Reports

Weekly Hours				Academic year	Human Rights	In Arabic	Material Name
Number of U	Total	practical	theoretical		Human rights	English	
2	2		2	The first	Arabic Language	Language of instruction	

The week	hours theoretical practical	Required Learning Outcomes	Unit or subject name	Method of education	Evaluation method
1-5	2	Definition of the right and the concept of human rights	Definition of the right and the concept	theoretical	Real-time questions , duties No extracurricular, exams

		The position of divine laws on human rights	of human rights		Short and exams Monthly, Reports Weekly
6-10	2	Division of government in terms of source of power and respect for the law	The division of government in terms of the source of authority and respect for the law	theoretical	Real-time questions , duties No extracurricular, exams Short and exams Monthly, Reports Weekly
11-16	2	Parliamentary system	Parliamentary system	theoretical	Real-time questions , duties No extracurricular, exams Short and exams Monthly, Reports Weekly
17-23	2	Election / the concept of election and its legal adaptation	Election / the concept of election and its legal adaptation	theoretical	Real-time questions , duties No extracurricular, exams Short and exams Monthly, Reports Weekly
23-30	2	System Secret Voting and Public Voting	For the system of secret voting and public voting	theoretical	Real-time questions , duties No extracurricular, exams Short and exams Monthly, Reports Weekly

Weekly Hours				Academic year	Industrial management and occupational safety	In Arabic	Material Name
Number of Units	Total	practical	theoretical			English	
4			2	The first	Arabic Language	Language of instruction	

The week	hours theoretical practical	Required Learning Outcomes	Unit or subject name	Method of education	Evaluation method
1-5	2	Management and organizational performance Production and manufacture of goods and services. - Types of production) continuous production and intermittent output (The difference between production and productivity.	Industrial Management	theoretical	Real-time questions , duties No extracurricular, exams Short and exams Monthly, Reports Weekly
6	2	Conceptual model of production management Production management scope Competitiveness in the production function	Systems approach in Production Management	theoretical	Real-time questions , duties No extracurricular, exams Short and exams Monthly, Reports Weekly
7-8	2	The main tasks covered by the production management system Planning marshalling Leadership	Management qualities Good industrial	theoretical	Real-time questions , duties No extracurricular, exams Short and exams Monthly, Reports Weekly
9-10	2	Extractive Industries Genetic industries Manufacturing Industries	Types of industries	theoretical	Real-time questions , duties No extracurricular, exams Short and exams Monthly, Reports Weekly
11-12	2	Capital estimates requirements. Capital cost estimates Classification of grades	Sources of funds	theoretical	Real-time questions , duties No extracurricular, exams Short and exams Monthly, Reports Weekly

13-15	2	Annual Fixed Investment Off-site capital Working Capital Percentage of investment methods	Fixed Investment	theoretical	Real-time questions , duties No extracurricular, exams Short and exams Monthly, Reports Weekly
-------	---	--	------------------	-------------	--

Weekly Hours				Academic year	English Language (1)	In Arabic	Material Name
Number of U	Total	practical	theoretical		English	English	
2			1	The first	English Language	Language of instruction	

The week	hours theoretical practical	Required Learning Outcomes	Unit or subject name	Method of education	Evaluation method
1-5	1	Hello Your World All about you	Unit (1.2.3)	theoretical	Real-time questions , duties No extracurricular, exams Short and exams Monthly, Reports Weekly
6	1	Family and friends	Unit 4	theoretical	Real-time questions , duties No extracurricular, exams Short and exams Monthly, Reports Weekly
7-8	1	The way I live	Unit 5	theoretical	Real-time questions , duties No extracurricular, exams Short and exams Monthly, Reports Weekly

9-10	1	Everyday	Unit 6	theoretical	Real-time questions , duties No extracurricular, exams Short and exams Monthly, Reports Weekly
11-12	1	Places I like	Unit 7	theoretical	Real-time questions , duties No extracurricular, exams Short and exams Monthly, Reports Weekly
13-15	1	My favorites	Unit 8	theoretical	Real-time questions , duties No extracurricular, exams Short and exams Monthly, Reports Weekly
16-19	1	Where I live	Unit 9	theoretical	Real-time questions , duties No extracurricular, exams Short and exams Monthly, Reports Weekly
20-23	1	Times past	Unit 10	theoretical	Real-time questions , duties No extracurricular, exams Short and exams Monthly, Reports Weekly
24-25	1	We had a great time!	Unit 11	theoretical	Real-time questions , duties No extracurricular, exams Short and exams Monthly, Reports Weekly

26-27	1	I can do that!	Unit 12	theoretical	Real-time questions , duties No extracurricular, exams Short and exams Monthly, Reports Weekly
28-29	1	Please and thank you	Unit 13	theoretical	Real-time questions , duties No extracurricular, exams Short and exams Monthly, Reports Weekly
30	1	Here and now	Unit 14	theoretical	Real-time questions , duties No extracurricular, exams Short and exams Monthly, Reports Weekly

Weekly Hours				Academic year	Material Transmissio	In Arabic	Material Na
Number of U	Total	practical	theoretical		Mass transfer	English	
				8	4	2	2

The week	hours theoretical practical	Required Learning Outcomes	Unit or subject name	Method of education	Evaluation method
The first	2/2	Introduction to chemical engineering and mass transfer, generally		Theoretical/Practical	Real-time questions , duties No extracurricular, exams Short and exams Monthly, Reports Weekly

Second	2/2	Diffusion in binary mixtures of gases.	Calculation of rate of mass transfer and flux in gases.	Theoretical/Practical	Real-time questions , duties No extracurricular, exams Short and exams Monthly, Reports Weekly
Third	2/2	Maxwell Theory	Diffusion in binary and multi component system	Theoretical/Practical	Real-time questions , duties No extracurricular, exams Short and exams Monthly, Reports Weekly
Fourth	2/2	Diffusion in binary liquid mixtures	Calculation of rate of mass transfer and flux in liquids.	Theoretical/Practical	Real-time questions , duties No extracurricular, exams Short and exams Monthly, Reports Weekly
V/VI	2/2	Diffusion in multi – component liquid mixtures .diffusivity calculating.	Diffusion rate and empirical correlations to find diffusivity.	Theoretical/Practical	Real-time questions , duties No extracurricular, exams Short and exams Monthly, Reports Weekly
Seventh	2/2	Convective mass transfer. Mass transfer coefficients.	Correlating the flux in terms of mass transfer coefficients.	Theoretical/Practical	Real-time questions , duties No extracurricular, exams Short and exams Monthly, Reports Weekly
Eighth	2/2	Diffusion theories.	Film theory, and two film theory	Theoretical/Practical	Real-time questions , duties No extracurricular, exams Short and exams Monthly, Reports

Ninth	2/2	Equilibrium curves and over all mass transfer coefficients.	Relation between mass transfer rate and reaching equilibrium state.	Theoretical/Practical	Real-time questions , duties No extracurricular, exams Short and exams Monthly, Reports
X	2/2	Finding No. of stages theoretically and graphically.	calculating the required number of trays to obtain the degree of removing or recovering	Theoretical/Practical	Real-time questions , duties No extracurricular, exams Short and exams Monthly, Reports
atleast Tenth/ Viten	2/2	Types of absorption columns. (Tray and Packed).	the difference between using plate tower or packed bed column for a certain separation process	Theoretical/Practical	Real-time questions , duties No extracurricular, exams Short and exams Monthly, Reports
Seventeenth / Twentieth	2/2	Design equation for dilute solutions.	Finding the design equation when solute concentration less than 10%	Theoretical/Practical	Real-time questions , duties No extracurricular, exams Short and exams Monthly, Reports
atleast Twenty/ Fourth Twenty	2/2	Finding HTU and NTU.	For a packed column, column height is a function of HTU and NTU.	Theoretical/Practical	Real-time questions, duties No extracurricular, exams Short and exams Monthly, Reports
V Twenty/	2/2	Column efficiency.	Point eff. Murdree eff. Overall eff.	Theoretical/Practical	Real-time questions, duties No extracurricular, exams Short and exams Monthly, Reports

Sixth Twenty	2/2	Constant and variable Mass transfer area.	The effect of area with different shapes in diffusion rate	Theoretical/Practical	Real-time questions, duties No extracurricular, exams Short and exams Monthly, Reports
Seventh Twenty	2/2	Boiling point diagram.	Most effective diagram in distillation columns to find the vapor liquid equilibrium	Theoretical/Practical	Real-time questions, duties No extracurricular, exams Short and exams Monthly, Reports
Eighth Twenty	2/2	Vapor liquid equilibrium.	Standard shape for VLE and the deviation from standard one, how to design such columns.	Theoretical/Practical	Real-time questions, duties No extracurricular, exams Short and exams Monthly, Reports
Ninth Twenty/ Thirty	2/2	Fensk's equation, Minimum No. of reflux ratio.	How to find the minimum reflux ratio graphically and analytically	Theoretical/Practical	Real-time questions, duties No extracurricular, exams Short and exams Monthly, Reports
